

Proper Tree Planting in the Urban Forest

FREE WEBINAR

Join us to learn what common mistakes are made when planting urban trees and how to avoid them.

Ever wonder why the trees you are planting or are having planted in your municipality are not surviving? It all revolves around location, preparation, and reality. Gary Eichen walks you through the steps necessary from starting from scratch to ensure your investment survives. The importance of soil, tree fertilizer is not tree food but much more. What to do, what to ask for when going out for bids, what to look out for, and when to realize if it sounds too good to be true, it probably is.

Gary Eichen, Certified Arborist and Assistant Service Line Director for Plant Health Care and Lawn Care for SavATree LLC, gives you tips for how to best plant trees in urban environments. All are welcome. Please join us for this free opportunity!
