

What's Up with My Tree?

How to determine the problem and what to do. Learn about the biggest insect and disease problems affecting trees throughout Michigan

FREE HOMEOWNER PRESENTATION

Learn how to make sure your trees stay healthy and what you can do to prevent diseases!

Kay Sicheneder is chief consulting arborist for Owen Tree Service. During her 25 year career in tree care, Kay helped implement Integrated Pest Management programs for landscape trees and shrubs, conducted inventories, sold tree work, and worked tree crew. She will discuss the most imminent threats facing trees in West Michigan. Her presentation will include identification and mitigation measures to ensure the long-term health and vitality of West Michigan's trees.

Topics to include:

- Oaks and their many problems
- Beech Bark Disease
- Spruce decline
- Scale infestations
- Leaf Spot Diseases
- Spotted Lanternfly
- Trellis Rust and others...

ISA and SAF credits pending
